ETS Headaches?

Confused by VER's, FMA's and NZU's or lacking time to understand ETS requirements and opportunities? ETS administration, compliance and NZU account management are complex, time consuming and complicated by having to deal with multiple government agencies. Your organisation may not have time or expertise to regularly interact in ETS or NZEUR environments to manage administrative functions. Duties end up being poorly managed and regulatory requirements compromised. Worst of all, carbon opportunities and money are lost in the confusion.....

Recent prosecutions by MPI suggest that poor ETS administration will no longer be grounds for non-compliance with regulatory responsibilities. **An upcoming ETS review** may mean legislative changes and further complications, increasing your compliance risk.

Forme Consulting can provide a fully independent review of your ETS administrative functions to ensure that regulatory requirements are being met. Our ETS expertise and knowledge will allow you to make informed business decisions regarding your carbon profile and carbon account. Engaging Forme to manage your ETS and NZEUR interface will free up valuable staff time, allowing you and your team to concentrate on core business activities.

New Zealand's leading forest companies have engaged Forme to review their ETS administration and reconcile ETS activities with registry holding account balances. Understanding this link is key to leveraging your carbon opportunities. Forme are often retained by a number of our clients to manage their ETS and NZEUR account interface providing ongoing strategic advice on ETS and carbon matters. Many organisations we help were not previously aware of rewards and opportunities available to them and ***the resulting cost benefits have been significant.***

Forme has strong ETS Capability and we are Independent Consultants

Kevin has a broad range of ETS/Carbon scheme management experience, GIS capability, PFSI, Afforestation Grants administration and operations expertise. He is a Registered Forestry Consultant, has a Diploma in Forest Management and a Masters degree in Business Administration.
